Microsoft Secure Remote Work Workshop
Deploy Remote Work Scenarios—Rapidly and Securely

Remote work is enabling millions of workers around the world to stay productive, helping organizations to maintain business continuity in the face of our global health crisis.

Enable your team to work from anywhere with a Remote Work Workshop

With this one-day workshop, we'll show you how you can use Microsoft technologies to:

Empower People to Stay Connected

- Enable people to meet and collaborate from home
- Engage people with virtual events and communications
- Make productivity applications available on any device

Maintain Security and Control

- Enable cloud identities with single sign-on and self-service password reset
- Secure, remote access to Microsoft Teams

Workshop Highlights

Evaluate your remote work options and business implications in one workshop

Goal is to enable remote work quickly, with more advanced options at a later stage

One day workshop leaves you with a concrete deployment plan, timelines, and next actions

Why Attend Workshop?

We'll discuss the most critical steps for remote work, and how we can rapidly deploy key scenarios. We'll also evaluate your options and leave you with a concrete deployment plan and next steps.

This one-day workshop is primarily focused on business continuity, addressing the following quick steps of enablement:

Enable Cloud or Hybrid Identity

Single sign-on and self-service password reset

Rapid Deployment of Teams

Understand how to quickly activate, install, and configure Microsoft Teams

Provide Adoption Kit

End user training, workload introductions & support resources

Secure Access to Teams

Gain more insight into Conditional Access and MFA

In addition to the **Deployment Guidance report**, you'll get:

- Environmental & workload analysis, including a quick assessment of your security posture
- A list of actionable recommendations to deploy hybrid identity, Microsoft Teams, and security
- Teams & Security Adoption Kit, including end user training, workload introductions, and support resources
- An inside look at Microsoft's holistic approach to remote work and how it relates to your organization
- Identification of potential blockers and challenges
- Recommendation on free Microsoft 365 trials for immediate deployment
- Comprehensive technical guide for advanced remote work scenarios

Follow-up Discussions

The one-day workshop is focusing on quick and secure remote work enablement, which is also a foundational element for future conversations on our Microsoft 365 solutions. There are additional, Microsoft-sponsored workshop conversations that are available, including:

- Teams Adoption Workshop
- Teams Meeting Workshop
- Teams Calling Workshop
- Teams Solution Workshop
- Secure remote access to on-premises apps (App Proxy)
- Enable users to securely access cloud apps from outside corporate networks
- Advanced Security Workshop (including Threat Check)
- Compliance Workshop
- Windows Virtual Desktop Workshop

About Core BTS

As you pursue your digital transformation through Microsoft 365, deploying security components is crucial and may be one of the first steps your organization takes. Build on top of your security and management capabilities with Microsoft 365 Security stack to progress on this journey with enhanced confidence. As you roll out Microsoft 365 across your organization, you can give your users more freedom and autonomy in how they work and collaborate, while building an intelligent management and security strategy.
